SCAN ME

Benefits of a Tiny Home

One of the greatest benefits of a tiny home is the cost savings. Because the space is so much smaller than the average house, you'll have lower electricity bills, smaller monthly payments, and lower upkeep costs. On top of that, the house will cost less to buy upfront.

Another benefit is the lower environmental impact. A tiny home requires less materials to build, takes up less land, uses less electricity, and produces less emissions. And on a personal level, the small space means you'll have less space to clean, and you'll probably stop buying items you don't need.

Benefits:

- Extremely environmentally friendly
- Sustainable Materials
- Extremely energy efficient
- Easily go solar
- Surprising amount of storage
- Higher Quality of Life
- Self-Sustaining is Possible

CONSTRUCTION

CLIMATE CONTROLLED

All of our homes are manufactured in a climate controlled and environmentally friendly facility to ensure both high quality and low footprint.

10 Year Warranty

Our transparent 10 year warranty policy will leave you feeling confident and at ease with your decision to build your dream home with us.

SUPERIOR INSULATION

Energy efficient with either spray foam insulation or ICE panels.

Services:

- Consultation
- Tiny Homes
- New Designs
- Apprenticeship program
